

Port: Derince, Turkey

Location: The port of Derince is situated on the N shore of the Gulf of Izmit.

General overview: It is the main general cargo port in the Gulf. It is an important port as an alternative to the port of Haydarpara due to its proximity. The port handles dry bulk, liquid bulk and general cargoes. The port comprises the sub-port terminals of Petrol Ofisi, Shell Derince, Koruma Klor Alkali and Aktas Terminal. Exports: Include magnesite, steel, iron and general cargo. Imports: Include aluminium, logs, rubber, scrap paper, steel, iron and timber products.

Traffic figures: Approx 370,000t cargo and 1,700TEU handled annually.

Max size: Draught 11.0m, 25,000DWT.
